## HOW TO MEASURE SHOCK ABSORBERS

It is very important to know how to properly measure CLOSE / OPEN dimensions of the shock absorbers.

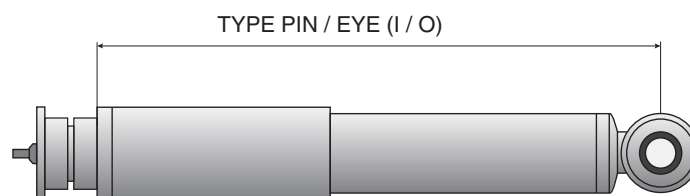

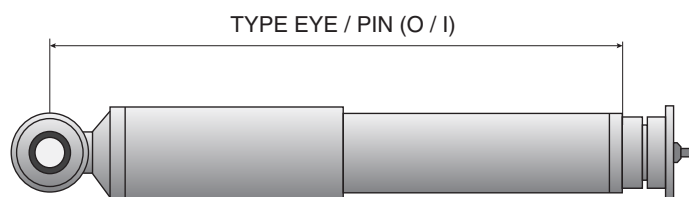

In the Eye/Eye type, we measure from centre of Top Eye to centre of the Bottom Eye

In the Pin/Pin type, we measure shocks dimensions from where the pin protrudes from the top & bottom of the shock absorber. **We do not include Pin length into shock closed/open dimensions.**

In the combined types of shock absorbers Eye/Pin or Pin/Eye we follow the above rules for each type of the mounting.
